

HPP-xxxF 19" mounting panels

- 19 inch 1RU, 1.5RU, 2RU and 3RU panels, suitable for mounting the HS and HT series of splitters and taps
- 40, 60, 80 and 120 F-port holes with 22mm spacing for horizontal and vertical mounting
- Panels made from SPCC steel with a high quality paint finish
- Versatile and flexible solution supporting many applications

Overview

There is an increasing requirement for quickly available, high quality solutions that split and combine RF signals. Technetix has developed a concept with which we are able to deliver a versatile and flexible solution supporting many different headend applications.

The HPP-xxxF is a series of 19 inch mounting panels specially designed to accommodate our headend HS-xx and HT-xx splitter and tap series. The HPP-40F is a 1RU panel and has 40 F-port holes with a 22 mm port-port distance for both horizontal and vertical mounting. The HPP-80F is a 2RU panel and has 80 F-port holes. A 1.5RU panel with 60 F-port holes and a 3RU panel with 120 F-port holes are also available.

The panels can be stacked together to a maximum of two panels to support vertical configurations.

Construction

- The HPP-xxxF series is made of SPCC steel (Steel Plated Cold-Rolled Coil) with a high quality paint finish. The splitting/combining units are mounted using the supplied screws.
- 22mm F-port spacing to suit the Technetix HS- and HT-series of splitters and taps
